

Research Assistant, Global Brain Health Institute based in the Trinity College Institute of Neuroscience (TCIN)

The Global Brain Health Institute (GBHI) is recruiting a Research Assistant to join the vibrant team.

The Research Assistant will be responsible for supporting the organization and scientific programming of the 3rd Annual GBHI Conference to be held in April 2018 in Buenos Aires, Argentina; in addition to supporting other duties which arise from time to time.

The Research Assistant will work closely together with the GBHI team. This post is an excellent opportunity to develop project management skills and is suited to a self-motivated researcher with good organizational skills, familiarity with current office software, and the ability to work collaboratively with administrative, academic and research staff. Proficient oral and written English is essential. The ideal candidate will have a demonstrated track record of working well in a team environment.

The position will be based in the Trinity College Institute of Neuroscience and the successful candidate will report to the Deputy Chief Operating Officer (DCOO), GBHI. This is a fixed-term position of nine months duration, on a part-time or a full-time basis. The specific hours will be agreed in conjunction with the DCOO. The appointment will be made on the Research Assistant Salary Scale at a point in line with Government Pay Policy.

Application information

Candidates are encouraged to apply with a *Curriculum Vitae* (maximum two A4 pages) and a Cover Letter (maximum one A4 page) that specifically address the following points:

- Candidates should describe why they are interested in the position, including outlining any previous research experience related to Brain Health.
- Candidates should illustrate, through past example, their organizational skills and their ability to work as part of a team.

Completed applications should be emailed to the DCOO Anne-Marie.Glynn@GBHI.org; with the subject line "RA GBHI 1710".

Closing date for receipt of applications is **4 pm on Tuesday, 17th October 2017**.

Global Brain Health Institute

The Global Brain Health Institute (GBHI) is a joint venture of Trinity College Dublin, the University of Dublin and the University of California, San Francisco, founded with the support of the Atlantic Philanthropies. GBHI aims to contribute to the reduction in the scale and impact of dementia worldwide by developing, supporting, and empowering a new generation of global brain health leaders, Atlantic Fellows for Equity in Brain Health. The leaders will break down disciplinary boundaries to find innovative ways to intervene on behalf of vulnerable people in their communities and, in so doing, will reduce the impact of dementia globally. GBHI strives to raise dementia awareness, improve care, and train leaders who will influence local, national and global health policy.
