### Historical Foundations of Psychology

**Module Code:** PSU12150

**Module Name:** Historical Foundations of Psychology

**ECTS weighting:** 5

**Semester/term taught:** MT

**Contact Hours:** One term (MT) 22 lectures; 98 hours independent study

**Module Personnel:** Lorina Naci

### Learning Outcomes

On successful completion of this course, students will be able to:

- discuss how philosophical debates, empirical and experimental work in medicine and physiology, and evolutionary theory contributed to the emergence of a science of Psychology in the late 1800s;
- systematically evaluate the similarities and differences between major perspectives and key thinkers in psychology;
- critically appraise the contributions of these major perspectives and key thinkers to the history of psychology and its present-day application;
- trace the historic origins and paths of development of psychological knowledge pertaining to childhood, mental illness, pseudoscience and ethical research practice and critically analyse it within a wider socio-historical and intellectual context;
- be critical consumers of psychological knowledge and recognise why certain historical approaches were abandoned while others were improved and refined;
- demonstrate capacity for critical thinking about the interplay of core principles, research and practice in the development of various psychological disciplines.

### Methods of Teaching and Student Learning

The format of lectures will be mostly conventional but students are encouraged to ask questions, engage the lecturer in discussion and participate in group work and group presentations as they arise.

Inclusive curriculum: Each lecture and any supporting and accompanying documentation is posted on Blackboard to facilitate independent study and self-paced learning.
### Rationale and Aims

This module traces the development of the discipline of psychology from its philosophical and physiological foundations right up to its present-day application in various spheres of human activity. Students will be introduced to key historical happenings, conceptual issues, research approaches, and practices within the major psychological perspectives and fields of study.
